

In an effort to clean up nuisance areas in Grant, the City Council has adopted a Nuisance Ordinance.

Developed by Creighton Law College and the West Central Nebraska Development District (WCNDD), the adopted Ordinance sets forth a detailed plan for administrative actions for clean-up of properties that have been declared a nuisance by the city.

An assessment will be conducted in designated Area 1, and those residents requiring property clean up will be notified by a courtesy certified letter.

Residents will be given a specified time in which to clean up their properties prior to the action going before the city council.

Formal action will be taken on the properties that have not been cleared and declared a nuisance by the city council.
