

Ken Kohmetscher and Kathleen Dietlein of Ken's Construction in Madrid, recently attended the MFS/York/Stormor and Brownie Systems National Sales Meeting in Grand Island. Dealers from throughout the United States and Canada attended the two-day sales event held at the Holiday Inn Midtown.

Highlighting the meetings were break-out sessions on the MFS/Stormor grain storage products, the York grain handling products and the Brownie structural support and safety equipment. All attendees also toured both manufacturing facilities with the new grain bin roof roll forming line creating the most excitement.

The company recently released a new line of non-structured grain bin roofs with load ratings exceeding others in the industry. During the morning general sessions, plans for the future were also shared with attending dealers setting the stage for future expansion of the business.

During the annual awards banquet, Ken's Construction was presented with the prestigious Silver Award for exemplary sales of the company's products in 2011.

MFS/York/Stormor and Brownie Systems are divisions of Global Industries with headquarters in Grand Island. The products manufactured by these divisions are sold throughout the world through an extensive dealer network.
