

The 2010 Fall Seed Guide from University of Nebraska Extension is now available. The Guide is available in two-form, on the web and as a printed publication.

Two test sites of interest to SW4 wheat producers are the Enders and McCook locations. The Enders location was irrigated while McCook was dryland.

For the web version of the Fall Seed Guide results go to:  
<http://cropwatch.unl.edu/web/varietytest/wheat>. Individual test plot results can be viewed on the web or download the full publication.

A printed copy may be obtained at the local SW4 Extension offices.

For more information contact Robert Tigner SW4 extension educator, Imperial at 308-882-1409.
