

The 35th annual Husker Harvest Days show will be held Sept. 11, 12 and 13 at its permanent location west of Grand Island, Neb. The show is recognized as the world's largest totally irrigated working farm show and features the most extensive state-of-the-art information and technology available for today's agricultural producers. Its field demonstrations and crop technology exhibits are geared to Nebraska and western Corn Belt agriculture.

The country's top agribusinesses, plus many regional and local manufacturers and suppliers, are exhibitors. The crops produced on site for field demonstrations and crop-culture exhibits are under various center-pivot and lateral-move sprinkler irrigation systems and feature additional irrigation products and configurations. Many of these systems are demonstrated during the show. The nation's—and world's —top irrigation equipment and product suppliers are show exhibitors.

Farmers and ranchers from 28 states and several countries attend the show each year. Visitors have access to nearly 600 exhibitors with agriculture's latest product introductions, meet face to face with company representatives and gain hands-on knowledge about the latest products and services for their farms and ranches.

Husker Harvest Days is located west of Grand Island, 1-1/2 miles north and 2 miles west of Alda in central Nebraska on Husker Highway.

Admission is \$10 for adults, \$5 for ages 13-17, and ages 12 and under are admitted free. The public is welcome.

Discounted advance adult admission tickets are available at farmprogress.com/husker-harvest-days
