

Nebraska LEAD Group 33 participants were announced by Terry Hejny, director, Nebraska LEAD (Leadership Education/Action Development) Program.

The newest members of Nebraska's premier two-year agricultural leadership development program in its 33rd year are made up exclusively of participants who are involved in production agriculture and/or agribusiness in Nebraska, Hejny said.

"Once again we are proud to say that Class 33 appears to be filled with outstanding individuals from throughout the state," Hejny said.

The two-year program will begin in September. LEAD Fellows will participate in 12 monthly three-day seminars across Nebraska, a 10-day national study/travel seminar and a 14-16 day international study/travel seminar.

The goal of the program is to develop problem solvers, decision makers and spokespersons for agriculture and Nebraska.

Seminar themes include leadership assessment and potential, natural resources and energy, agricultural policy, leadership through communication, our political process, global perspectives, nuclear energy, social issues, understanding and developing leadership skills, agribusiness and marketing, advances in health care, resources and people of Nebraska's Panhandle and other areas designed to develop leaders through exposure to a broad array of current topics and issues and how they interrelate.

The Nebraska LEAD Program is operated by the non-profit Nebraska Agricultural Leadership Council in cooperation with the Institute of Agriculture and Natural Resources at the University of Nebraska-Lincoln and 10 other institutions of higher education throughout Nebraska.
